

**Sonitron N.V.**  
**Kasteelstraat 93 – 9100 Sint-Niklaas - Belgium**

## Important announcement

Sonitron is a manufacturer of piezo acoustic components based in Belgium. Our mission as an organization is to provide high quality products and continually improve the services towards our customers. We aim to do this by focusing on quality, customer satisfaction and the environment.

In addition to improve the future activities, Sonitron's research department is constantly looking for new markets, new products and new applications.

Sonitron will provide support and service options to encourage customers to take advantage of new products and alternatives. New products and alternatives are offered when a given product is labeled obsolete.

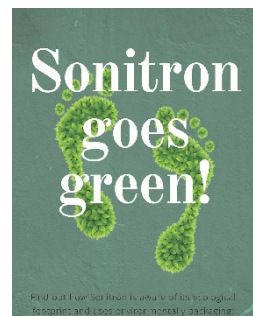

The Product Obsolescence Policy of Sonitron outlines how Sonitron will provide support for products that have been discontinued over the years. Products have become obsolete due to the introduction of newer products, due to the lack of availability of parts or a reduction in market demand.

Product obsolescence notifications, April 2018, includes :

Obsolete Product Code	Date discontinued product	Alternatives
SMA 17 L	2018-04	SMA 17
		SMA 17 LT
		SMA 17 LC
SMA 21 L	2018-04	SMA 21
		SMA 21 LT
		SMA 21 LC

Besides the investment of new products, Sonitron green policy explains how the company has an opportunity to make a positive difference to the local environment by reducing its ecological footprint.

Sonitron made eco-friendly choices to eliminate the use of plastic and polystyrene packaging. The company will continue to look for packaging made from renewable resources, biodegradable materials and those that can be easily recycled.
