Packaging Adjustment Notification Letter

Dear Valued Sonitron Customer/Distributor,

You will notice that your packaging for the **SMA-13-S** has been adjusted. We will be replacing the SMA-13-S board packaging and continue using the layer material of the **SMA-17-S** series. This change will not affect the quality or material of the goods.

The scope of the change is simply to remove the non-recyclable plastic material by choosing for a temporary alternative. This by using the packaging of the SMA-17-S series. Until these are used, we will switch to a more greener and recyclable alternative for all SMA SMD series.

Please note that this is a change to packaging only for the SMA-13-S series. We will begin transitioning into this packaging solution by **February 2022**. During this period, some shipments may contain less number of buzzers packed per board than before. (see packaging details)

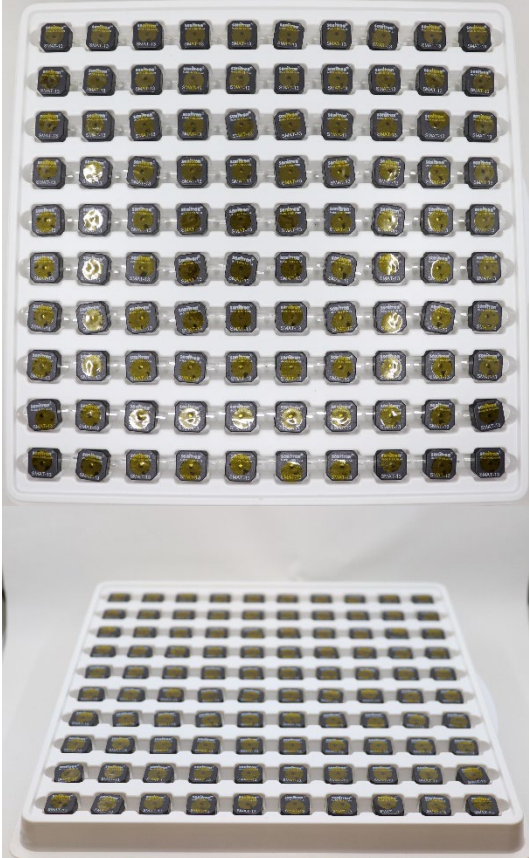

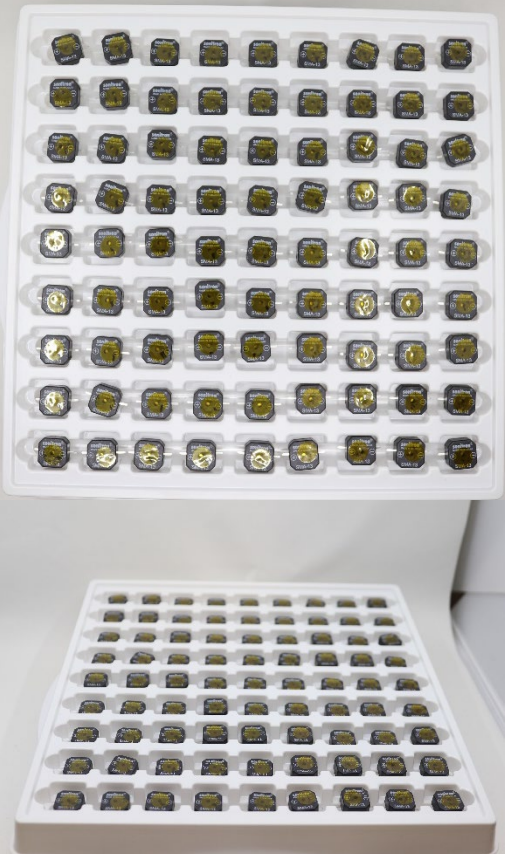

We appreciate your business and will continue to provide you with our products and services to meet your current and future needs. We apologies for this inconvenience that caused.

Should you have any questions or concerns regarding this notice, please feel free to contact us at support@sonitron.be.

Yours sincerely,

Sonitron NV
