

How to extend the lifetime of your Sonitron sound component

Optimise the lifetime of your Sonitron component by choosing for more robustness.
Adding product options can strengthen the lifespan...

Option SP02

The special option SP02 contains internal heavy duty wires (plastic insulation) and the solderjoints are sealed with silicone.

Sonitron cuptechnology

Choosing for a Sonitron buzzer with cuptechnology ensures maximum lifetime.

The robust internal mechanical construction of the Smac 25 makes it possible to have a lifetime of min.1000hours.
